

Your certified MRO partner

Sauter Bachmann is your MRO partner for flight controls, gear assemblies and components

Swiss precision gears

MRO & TEST – PART 145

With 20 years of experience, our EASA Part 145 approved Maintenance Organisation is capable of delivering world class maintenance, repair and overhaul services to a global customer base.

PRODUCTION & ASSEMBLY – PART 21

Our Maintenance Organisation is supported by our in-house EASA Part 21 approved production and assembly facilities. Swiss precision and more than 90 years of manufacturing know-how are combined to reliably meet the most demanding customer requirements.

SPECIAL PROCESSES & NDT – NADCAP

Our service offerings are based on the highest quality and inspection standards. NADCAP approved non-destructive test procedures (MPI, FPI, Nital Etch) as well as certified Heat Treat facilities form a key element within our production and quality system.

AIRWORTHINESS DOCUMENTATION – EASA/FAA/TCCA

Committed to our customers' specific requirements, we are in a position to deliver traceable and documented quality. This includes the issuance of triple-release (EASA/FAA/TCCA) airworthiness documentation.
